Yojan Kaphle

Full-Stack Developer (MERN, Python)
Kathmandu, Nepal | yojankaphle.01@gmail.com | +977-9864549433

Summary

Full-Stack Developer with hands-on experience building scalable, maintainable, high-performance web applications with the MERN stack, including backend APIs, databases, authentication, and asynchronous workflows. Expanding into Python and agentic AI development: locally hosted language models, RAG pipelines, embeddings, vector databases, and tool-using agents. Familiar with Linux environments and focused on reliable, production-oriented software.

Skills

Languages: Python, JavaScript, C++, Go, Java
Backend: Node.js, Express.js, Fastify, FastAPI, .NET, JWT Authentication
Frontend: React.js, Next.js
Databases and Queues: SQL, PostgreSQL, NoSQL, Prisma ORM, Redis, BullMQ
DevOps and Tools: Docker, AWS, Linux, Git, GitHub, Version Control
Security: Burp Suite, OWASP Top 10
AI: Agentic Engineering, RAG Pipelines, Embeddings, Vector Databases
Other: Team Management, Fluent in English and Hindi besides my mother tongue,

Experience

Full Stack Web Developer Intern | Skillshikshya, Kathmandu | 01/2026 – 04/2026

- Implemented and optimized features in existing web applications based on client requirements and functional specifications.
- Built responsive, reusable web interfaces from Figma designs, keeping them consistent across screen sizes and devices.
- Implemented JWT-based authentication and explored access/refresh token rotation strategies to improve application security.
- Offloaded background tasks to message queues to improve API responsiveness.
- Implemented Redis-based caching and rate limiting to reduce unnecessary database operations and improve API performance.
- Designed PostgreSQL and NoSQL schemas with Prisma ORM, including relationships, constraints, transactions, efficient queries, and indexes.
- Debugged and optimized issues across the frontend, backend, and database layers to improve reliability and performance.
- Collaborated with developers and UI/UX teams using Git branching, merging, and pull requests to deliver maintainable features.

IT and Communications | Sankalpa Agrotech Pvt. Ltd., Nepal | 05/2022 – 02/2023

- Built and deployed the company website using React.
- Managed cloud hosting, updates, and uptime of the website.
- Assisted internal teams with IT communications and troubleshooting.
- Pitched the company to prospective investors and supported the CEO on growth planning.

Projects

Gambit | Fastify, Node.js, React.js, WebSockets | https://gambit-ruddy.vercel.app/

- Built a full-stack chess application with single-player and real-time multiplayer modes, using WebSockets for low-latency move synchronization.
- Implemented an adventure-style bot mode that progressively increases AI difficulty across levels.
- Added authentication and protected multiplayer functionality so only authenticated users can join online games.
- Designed an advertising-based monetization model with contextually relevant ads.
- Built a responsive interface for a consistent experience on desktop and mobile.

GharSajilo | MERN Stack | https://final-year-project-iota-one.vercel.app/

- Built a room rental platform serving location-based property listings across Nepal.
- Implemented JWT authentication, role-based access control, CRUD property management, and advanced search and filtering.
- Built a map-based discovery feature using geospatial search so users can pan the map and explore listings in the visible area.
- Added a comparison feature to help customers find the best property within their price range.
- Gave landlords control over the information, pricing, and discounts shown for their properties.

Education

Bachelor of Science in Computer Science and Information Technology (BSc CSIT) | Tribhuvan University, Kathmandu | 08/2026

- Graduated with 76.26% (First Division) in aggregate; ranked top of class in field activities and project work.
- Participated in multiple hackathons and also mentored teams for victory.
